Frontend Developer with 2+ years of Experience in building scalable web applications.

## Technical Skills

**Frontend:** JavaScript, DOM, React.js, HTML5, Tailwind CSS, Bootstrap, Material UI

**Backend:** Node.js, Express.js, API design, CI/CD pipelines

**Database:** MySQL, MongoDB, PostgreSQL

**Data Analytics and Integration:** Python, Snowflake, Databricks, Apache Airflow, Tableau

**Web Dev Tools:** Github, Figma, Postman, Netlify, Chrome Dev Tools

**Other Skills:** Data Structures & Algorithms, Performance optimization

## Experience

### Cognizant

June 2022 – Present

#### Frontend Developer

Pune, India

- Designed a UI using HTML, CSS, JavaScript & Python for automating email notifications for Airflow DAG failures, enabling internal teams to select templates, input details, and send emails via Outlook, **saving 10 minutes per email**.
- Developed frontend using React.js for Kanban Board type ticketing system for internal teams to promote highly efficient asynchronous and synchronous work, **increasing efficiency by 12%**.
- Developed a real-time data visualization dashboard for a retail client using React.js, Node.js/Express APIs, and MySQL optimized for **handling 10M+ records, improving inventory management by 30%**.
- Collaborated closely with UI/UX designers to transform Figma designs into fully functional websites and created reusable React components from HTML themes.

## Personal Projects

### [Farm2Door](#) - Front End And Back End Development ([Github](#))

April 2024 - May 2024

**Tech Stack:** Node.js, Express.js, React.js, Redux, Tailwind CSS, Image to Base64, Stripe Payment Gateway

- FrontEnd using React.js and Tailwind CSS for creating interactive, intuitive and responsive user interfaces.
- Backend Implementation using Node.js and Express.js to handle **API integrations** and database operations.
- Database Management utilized MongoDB as the database to store and manage product info and user data.
- Product catalog, shopping cart functionality: Created a product catalog with features like filtering.
- Implemented **Stripe as the payment gateway** for seamless and secure transactions.

### [Spotify-clone](#) - Front End And Back End Development ([Github](#))

Jan 2024 – Mar 2024

**Tech Stack:** Node.js, Express.js, React.js, Tailwind CSS, JWT, Cloudinary, MongoDB

- FrontEnd development using React.js and **Tailwind CSS** for seamless user interface.
- Backend Implementation using Node.js, Express.js and MongoDB to build **RESTful APIs** to handle and store user data, song metadata, and playback functionality.
- Utilized React's **Context API** with Redux to manage global song state, ensuring playback across all pages.
- Integrated **JWT** for secure user authentication and authorization, maintaining user session integrity.
- Used Cloudinary for efficient media contributing to the web application's performance and scalability.

### [Musclify](#) - Front End Development ([Github](#))

Nov 2023 – Dec 2023

**Tech Stack:** React.js, Material UI, RAPID API.

- Developed interactive user interface with React.js, creating components for exercise library, detailed exercise pages, and navigation elements.
- Designed a clean and responsive layout using **Material UI**, ensuring consistent styling across devices.
- Fetches exercise data and YouTube search results using **RAPID API**, populating the exercise library with detailed information and videos.

## Education

D.Y. Patil College of Engineering, Pune

Jul 2018 – June 2022

Bachelor of Technology in Civil

9.05 GPA
